JULIET PENDANT

124-2106

Floating in the air one next to each other, in an eclectic overlap of colors and refraction: They appear as a small suspended universe ruled by harmony, which returns a clear and amplified light from luminous elements, brightened up by colors. The tactile surfaces are shiny but soft at the same time; turning the light on off, they look lively and attractive as though they they are talking. The Juliet pendant is part of a collection, made of borosilicate glass, where pendants can be put together freely. The smooth rounded corners, obtained by particular radius of curvature, remind to manufacturing of precious stones, while the coloring (made with a particular oxidizing process) and the matt finishing give back a soft and graceful surface. The tactile surfaces are shiny but soft at the same time; turning the light on off, they look lively and attractive as though they they are talking. Available in a variety of sizes and/or finishes, including custom. Please contact us for details.

OPTION	MATERIAL/FINISH	DIMENSION	PRICE
